EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Lanny R. Lee on September 1, 2005.

The application has been amended as follows:

Claims 17, 21 and 26-32 have been cancelled.

Claim 13 line 8, the spelling of "filsters" has been corrected to "fillisters". This is consistent with claim 1.

Allowable Subject Matter

3. Claims 1-3, 6-16, 18-20 and 22-25 are allowed.
4. The following is an examiner's statement of reasons for allowance: regarding claim 1, the prior art of record fails to anticipate or render obvious an external expandable holding device comprising a first member having an external surface with an annular groove having protruding lips with a resilient expansion sleeve is fusibly connected to the protruding lips along the annular groove, wherein a fillet along the lip and fillister along the expansion area relieves stress. Regarding claim 13, the prior art of record fails to anticipate or render obvious an internal

expandable holding device comprising an expansion chamber with rounded corners to eliminate stress concentration extends to a thin wall, and wherein to further reduce stress concentrations the bore surface has filsters along the thin wall.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Atherholt et al. teach holding device having a sleeve fusibly bonded to an outer surface. Laube and Andre each teach an internally expanding holding device, wherein the expanding sleeve is formed with internal grooves. Andre teaches that the grooves facilitate flexing of the sleeve. Wittenborn (DE 27 19 655) teaches an externally expanding holding device having a sleeve with a reduced diameter portion.
